Quintal International Co., Ltd

Sleek & Elegant

Quintal offers quality with a wide range of options for the basic installation. Offers Comfortable, safe, economical electrical installation.

Quintal switch range combines a Extremely simple design with functional material and intelligent technology. It is available in different colour choices.

Quintal Range combines simple and timeless elegance with an exposed size. The frames are available in three different design variants. In addition to the classic pure white and the colours chrome, brass and platinum offer further possibilities for finishing architectural concepts with upscale standards.

Rich material & long service life

Aluminium

Modern colour concepts expertly set accents using dark colours. The frame made of polished, anodised aluminium in black is perfectly integrated in these concepts. Anodising protects and changes the colour of the aluminium with an artificial oxide layer. The natural grained structure of the material is maintained. The feel of the surface does justice to its high-quality appearance. For example, when combined with white inserts, the result is an attractive interplay of a modern forefront and a classic background.

Colour: Brown

legant texture Clear depth Visual effect

Glass

There is an appealing combination of the clear form of the Quintal frames and glossy glass. The frames of Quintal glass are color high lighted in black, white, and golden. This gives them a very sophisticated appearance on both light and dark backgrounds.
